

**ADVANCED GENOMIC SOLUTIONS (AGS)**

# Your Privacy. Our Priority.

AGS  
**GeneShield**

## **Our GeneShield™ Guarantee:**

AGS GeneShield™ is a proprietary combination of policies and procedures designed to protect each client's most personal information – their genetics.

Unlike many other genetic companies, AGS does not sell, disclose or transfer client data to any third party or use client data for research purposes. Period. No exceptions.

In compliance with GINA (Genetic Information Nondiscrimination Act of 2008), AGS does not provide individual genetic data to employers. We do provide aggregated, de-identified data to employers on health improvements measures for existing wellness programs.

AGS operates its own fully accredited genetic laboratory with US and international credentials (CLIA and CAP) for the highest levels of reporting security and result accuracy.

All reports are delivered directly to you in encrypted format and store offline.
